DETAILED ACTION

REJECTIONS WITHDRAWN

1. There are no rejections withdrawn.

REJECTIONS REPEATED

2. All of the rejections set forth in the non-final rejection of 7/17/06, pages 2-3, paragraphs 1-2 are repeated for the reasons of record.

NEW REJECTIONS

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 44-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kleyn (US 5547096) in view of Hata et al. (US 6033749).

Kleyn discloses wherein the barrier member is exposed to the opening space, or the barrier member or layer is exposed to the opening space (since barriers 34, 36, or 18 from Fig. 2 are exposed to the open space).

ANSWERS TO APPLICANT'S ARGUMENTS

5. Applicant's arguments of 11/17/06 have been carefully considered but are deemed unpersuasive.

Art Unit: 1772

Applicant has argued that the enclosure gaskets of Kleyn are not provided to prevent permeation of vaporized fuel. However, applicant does not claim anything with regards to fuel permeation and in fact applicant does not even claim gas barrier layers or members.

Applicant argues that Hata fails to disclose or suggest the permeation of fuel at the peripheral portion of a fuel tank opening. However, applicant does not claim anything with regards to fuel permeation and in fact applicant does not even claim gas barrier layers or members.

Applicant has argued that Kleyn in view of Hata fails to disclose a cut-out of groove is provided at an outer surface of the fuel container around the opening, and the cut-out or groove is covered or filled with a barrier member made of material (C). However, enclosure gaskets 34 and 36 are barrier members (column 3, lines 5-10) since they provide a leak tight seal and thus qualify as barrier members. Furthermore, the openings 30 and 32 are cutouts which are covered by barrier members 34 and 36.

Applicant has argued that Kleyn fails to disclose the new limitations of 44 and 45 since the gaskets 34 and 36 are not exposed to the space inside apertures 30 and 32. However, 34 and 36 fill the apertures and are thus clearly exposed the apertures.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1772

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
